Experience

Allegro, Senior Fullstack QA Engineer, Remote, Oct 2025 - Present

Leading e-com company in Europe. Led testing of releases across 11 inventory asset domains within the WMS (Warehouse Management System) product and technology department. Creating a framework for test automation, built a test framework, covered core e2e scenarios, wrote UI tests across 3 domains, automating regression suites in GitLab CI. Designed a PageObjectModel Generator script - auto-generates PageObjects. Cut manual POM creation from 60-100 minutes to 3-5 seconds (~1200x acceleration). Ran weekly duty shifts. Interacted with Frontend teams, business stakeholders, managers, and analysts. Tested hardware emulators (barcode scanners).

Lastminute.com, QA Automation Engineer, Remote, Oct 2024 - Oct 2025 (1y)

Implemented Playwright automated tests for key ticket search and booking scenarios on a TravelTech, cutting regression time on specific scenarios from ~1 hour of manual testing to ~3 minutes in automated CI (~20x faster per run) and covering 30+ core scenarios. Identified application bottlenecks during load testing under 1000+ concurrent users, discovering slow SQL queries during mass search requests. Optimization of these queries reduced response time by ~34.5%. Managed test cases in TestRail, read logs in Kibana and ElasticSearch, worked with Docker/Docker-compose while learning microservice architecture.

Fairmarkit, Frontend Developer, Remote, Jan 2022 - Oct 2024 (2y 10m)

Led layout development for the information portal (20+ screens), working directly with the chief designer, and implemented component multilingual support across 3 languages for foreign partners. Developed and supported the client side of a high-load B2B state procurement portal serving 10K+ users: wrote new Vue components, covered them with snapshot tests, and prepared data mocks for testing without DB connection, cutting frontend testing time by ~23.5%. Single-handedly designed and developed a Gantt Chart component, led the migration from Vue 2 to Vue 3, successfully defended the project before stakeholders, and consulted backend developers on data structure, reducing integration bugs by ~27%.

Epam, QA Automation Engineer, Remote, Jun 2020 - Jan 2022 (1y 7m)

Implemented Playwright tests for key online store scenarios, reducing regression testing time - 2h of manual runs to ~4 min of automated CI runs (~39x faster per run). Developed UI tests, performed API testing. Created test documentation. Gained experience writing tests in Python (Pytest, Selenium). I had experience as the sole tester.

Education

Herzen State Pedagogical University (2024 - 2026)
Master Degree in **Corporate E-Learning**

Herzen State Pedagogical University (2020 - 2024)
Bachelors Degree in **Computer and Information Sciences**

Skills

QA	Git, Gitlab, Github, CI/CD, JavaScript, TypeScript, Playwright, Selenium, Postman, DevTools, Allure TestOps, Jira, Confluence, Kibana, Grafana, Prometheus, Swagger, Flasgger, Apache JMeter, Load Testing, REST
Frontend	HTML, CSS, Vue 2 / 3, Composition API, OOP
Design & AI	Figma, Pixel-perfect, ChatGPT, Claude, DeepSeek, Doubou, Copilot
Patterns & Methodology	Test Design, Page Object, Page Element, Page Factory, Scrum, Kanban
Other	MySQL, SQL, PostgreSQL, bash, Powershell, Linux, Docker, Docker-Compose, **English - B2** (Upper-Intermediate)
